Re: Cultural Resources Records Search for the Jurupa/Mountain View Project

Dear Mr. Maxon,

We received your request on December 01, 2003, for a cultural resources records search for the Jurupa/Mountain View Project located in Sections 29, 30 and 31, T.2S, R.5W, SBBM in the city of Riverside in Riverside County. We have reviewed our site records, maps, and manuscripts against the location map you provided.

Our records indicate that 13 cultural resources studies have been conducted within a one-half-mile radius of your project area. Three of these studies involved portions of the project area. As per your request, reports RI-3893 (1084859) and RI-4451(1085796) are included for your reference. These reports are listed on the attachment entitled "Archeological Reports" and are available upon request at 15¢/page plus \$30/ hour. The KEYWORD section of each citation lists the geographic area, quad name, listing of trinomials (when identified), report number in our manuscript files (RI#), and the number of pages per report.

No cultural resources properties are recorded within the boundaries of the project area. Our records indicate that eight properties have been recorded within a one-half-mile radius of the project area. Copies of the records are included for your reference.

The above information is reflected on the enclosed map. Areas that have been surveyed are highlighted in yellow. Numbers marked in blue ink refer to the report number in our manuscript files (RI#). Cultural resources properties are marked in red; numbers in black refer to Trinomial designations, those in green to Primary Number designations.

Additional sources of information consulted are identified below.

National Register of Historic Places (03/12/02): no listed properties are located within the boundaries of the project area.

Office of Historic Preservation, Archaeological Determinations of Eligibility (01/06/03): no listed sites are located within the boundaries of the project area.

Office of Historic Preservation, Directory of Properties in the Historic Property Data File (01/06/03): no listed properties are located within the boundaries of the project area.

The 1901 and 1942 USGS Riverside topographic maps does not indicate the presence of possible historical structures or features within the boundaries of the project area.

As the Information Center for Riverside County, it is necessary that we receive a copy of all cultural resources reports and site information pertaining to this county in order to maintain our map and manuscript files. Confidential information provided with this records search regarding the location of cultural resources outside the boundaries of your project area should not be included in reports addressing the project area.

Sincerely,

A handwritten signature in black ink, appearing to read "Darcy Wiewali", with a large, stylized flourish extending from the end of the name.

Darcy Wiewali
Information Officer
